**Release:** 23<sup>rd</sup> September 2022

### **Carriage of Radio and Data Services on Arqiva's Multiplexes on the UK DTT Platform**

Following a strategic review of its scope to offer radio/data capacity, Arqiva is pleased to invite offers for a 64kbps mono radio service on Multiplex C and also for up to 40kbps of data capacity on Multiplex D. Interested parties may bid for either or both items.

While the capacity on Multiplex C is primarily being offered for the use of a mono radio service, bids are also welcome from data service providers on the basis that the equivalent data capacity is 80kbps.

Arqiva Muxco Limited (**Arqiva**) is the licensed operator of multiplexes C & D two of the six national multiplexes which make up the UK's DTT platform, Freeview. Freeview is the largest digital television service in the UK with 18 million homes equipped to receive over 70 TV and 30 radio channels through a conventional aerial.

Interested parties should register interest by 5pm UK time 30th Sept 2022 at [sales@arqiva.com](mailto:sales@arqiva.com)
